

HIGH-EFFICIENCY AIR CLEANER

AIR CLEANER PRO

4 in 1

- **CLEANING**
- **UV-STERILISATION**
- **IONISATION**
- **HUMIDIFICATION**

 **SLEEP MODE**

The appliance automatically switches to sleep mode when the room light changes to evening light.

 **UV-STERILISATION**

 **IONISATION**

 **«AUTO» MODE**

In "AUTO" mode, the cleaner changes the engine speed automatically.

 **«CHILD LOCK»**

Locks the buttons on the cleaner's display. For added safety, the air purifier is equipped with an appliance position sensor that stops the cleaner's operation if it is tipped over.

 **«TIMER» FUNCTION**

Allows you to set the required switch-off time for the appliance in advance.

AIR CLEANER PRO

PRANA Air Cleaner Pro — is a state-of-the-art air cleaning, ionisation, humidification and sterilisation system that **kills up to 99% of viruses**.

This device helps to significantly reduce the number of germs in the air, thus dramatically reducing the chances of contracting viral and bacterial infections.

TECHNICAL CHARACTERISTICS

Clean Air Delivery Rate (CADR):
up to 488 m³/h

Filtration:
**6-step
cleaning system**

«AUTO» MODE

Voltage / frequency:
220 ~ 240 V, 50 Hz

Power consumption:
95 W

Noise (low speed):
≤ 24 dB

Number of operating speeds:
8

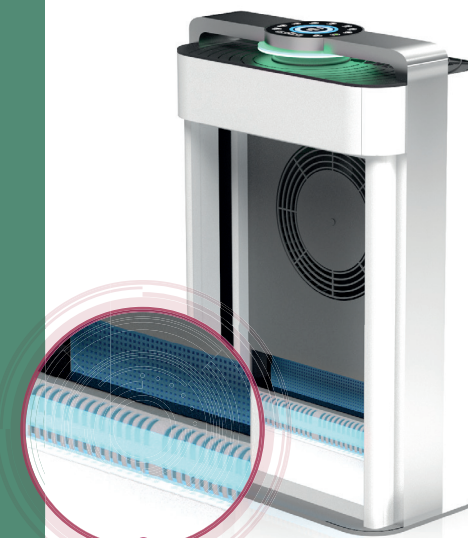

Size:
400 x 230 x 620 mm

Warranty period:
24 months

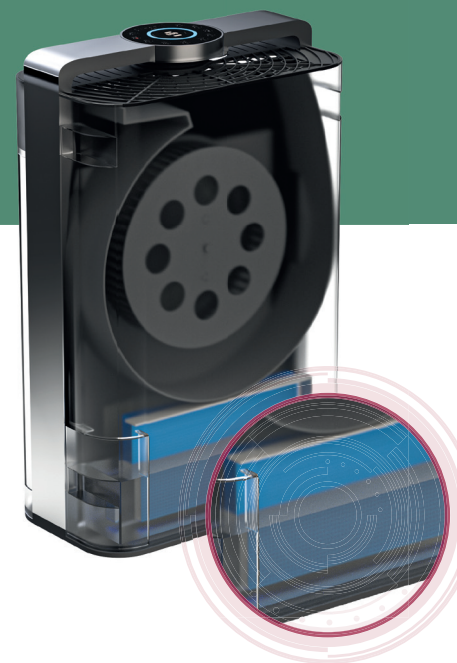

AIR CLEANER

Operation of the PRANA air cleaner Air Cleaner Pro is operated by means of buttons on the casing and remote control. In "AUTO" mode the cleaner does not require the user's attention - the speed of the cleaner changes according to the data received from the air condition sensor. The PM 2.5 particle sensor inspects the air quality every second and displays the information on the display.

UV STERILIZER

The bactericidal UV lamp in the casing of the cleaner disinfects the air and the filters by disinfecting bacteria, fungi, mould spores and viruses. The light does not penetrate the room, so this UV air disinfection is safe for people and animals.

AIR HUMIDIFIER

The humidification function works without any visible steam, which increases its efficiency and helps to maintain the air humidity level more naturally. The humidifier does not leave marks on furniture or other surfaces.

IONISATION

The device maintains the required amount of volatile negative air ions, which normalises the ionic composition of the air. In a confined space (flat, house, office) and an ecological imbalance, it is vital to breathe ionised air - it speeds up the metabolism, improves lung gas exchange, improves performance and promotes rest.
